# Sail the spanish main for Pieces of Gold

there's TREASURE to be won!

# there's TREASURE

## Basic Game

Five reel video machine with optional five or nine lines depending on selected version. Bet from one to ten coins per line, giving a maximum possible bet of ninety coins per game.

The Treasure Bonus feature game is triggered by three or more "scroll" symbols displayed in any position during the basic game. To start the Treasure Bonus game the scroll opens to reveal the Pieces of Gold treasure map.

## Treasure Bonus

The Pieces of Gold treasure map shows a Spanish Galleon sailing on the sea of Fortune. To win the Treasure Bonus the galleon must battle with up to five targets in the Neptune's Pearls Bay. The player selects the target and the galleon fires its cannon, revealing bonus prizes (from 1 to 500 times the player's original bet) when the target is hit. The maximum possible win in the bonus game is 22,500 coins. There is, however, danger for the galleon for the targets can return cannon fire. If the galleon is hit and destroyed, the Treasure Bonus game phase ends, returning the player to the basic game.
